Introduction

International Project Support Services - IPSS Ltd. with its main office in Tbilisi and branches in United States and Ireland was founded in 2001 with the mission of providing logistics and consultancy service to foreign companies, International missions, and NGOs.

IPSS has recently expanded its services to include:

- Construction Material Supply
- PPE Supply
- Product sourcing specific to client's needs
- Importation service
- Accommodation and Life Support
- Supply of work space, facilities and services

IPSS has the resources and the experienced team, ready to deal with our clients' Procurement and Logistics needs. We offer a value added service to allow our clients to forget their supply woes and focus on their core business.

IPSS is a distributor of personal protective equipment and many other occupational safety supplies, quality brands from the top manufacturers in United States and Europe.

Quality and competence are the basis of our work. Our commitment to providing safety products of the highest quality, for the benefit of the consumer, has been our top priority. Our technical expertise ensures that the customer gets the right product for the job first time round. Our goal of progress and foresight, reaffirm the company's continuing aspiration to supplying our valued customers with new innovative products that satisfies their demands.

Whether you are an individual expatriate or a global multinational company, we assure your success with our wide range of Safety Products.

First Aid Kits

This water-resistant plastic container was engineered to fit securely and easily into your vehicle's trunk, protecting contents.

- Supplies to provide immediate care in medical or trauma emergencies
- Includes personal protection kit to prevent contamination from blood or body fluids
- Case has removeable tray and locking latch
- Separate flip-top lid has storage for small items
- 10-1/4"H x 15-1/2"W x 8"D
- Made in USA

FA00003

Dyna Med® Rescue Responder Kit

Includes essential first aid supplies for first responders as well as supplies to protect against biohazards. Compact design fits easily in your vehicle's trunk.

FA00004

Dyna Med® Vehicle First Aid Kit

Contains all the supplies you need to administer basic first aid.

- Compact design stores easily in your vehicle
- Hard plastic case
- 4-1/2"H x 7-3/4"W x 1-1/2"D

Dyna Med® 50 Person First Aid Kit

- Meets ANSI Z308.1 - 1998 standard
- Sturdy metal case
- 2-3/4"H x 13-1/2"W x 9-1/2"D

Dyna Med® Personal First Aid Kit

Stocked with basic supplies in an easy to store package.

- Compact zip-lock nylon bag
- 5-1/2"H x 6-1/2"W x 3-3/4"D

This standard is applicable to protective clothing for the workers of industry exposed to heat.

Standard EN470-1 specifies the testing methods and the general requirements of performances of protective clothing intended for the operators of welding and related techniques presenting of the comparable risks.

This type of protective clothing has as an aim to protect that which carries it against small metal projections in fusion, the contact of short duration with a flame, like against the ultraviolet radiations.

HALF FACE MASKS

QuickLatch™

New QuickLatch NIOSH Approved Air Purifying Half Mask Respirators
The only respirators with the easy on - and - off latching system

Studies show workers remove and refit respirators up to 20 times a day. These frequent on-and-offs waste lots of time fumbling with straps, buckles and other equipment. Now, there's a better way.

Just flip the latch and the respirator slides off the face.

QuickLatch respirators require no clumsy tugging or strap stretching. Wearers don't have to remove hardhats, welding helmets or safety glasses, either. Instead, QuickLatch respirators save workers time. And saving time increases their productivity.

Refitting is just as simple.

Just close the latch and the respirator slides back into place on the face. It's simple enough to do with one hand.

Plus,

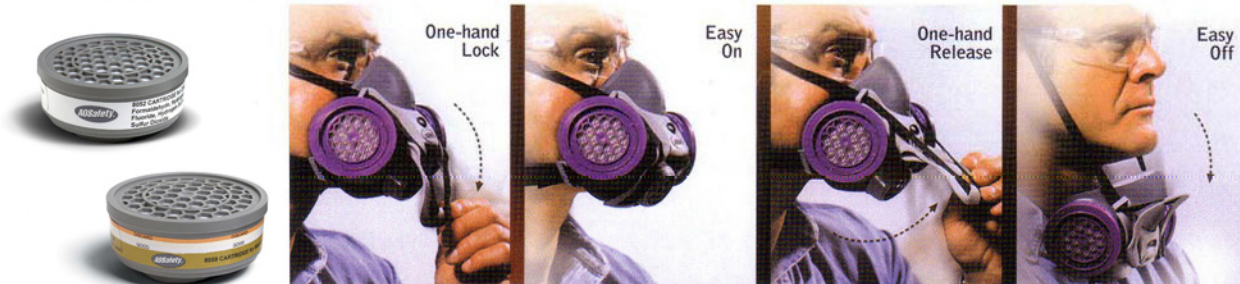

QuickLatch respirators have more advantages including:

- Contoured flange for exceptional fit and comfort
- No-snap straps with comfortable curved neck buckle
- Available in three sizes
- Choice of reusable (silicone or natural rubber) or low maintenance (TPR man made rubber)
- Replacement parts available for reusable models
- Users bayonet style filters or plastic cartridges
- Fit testing accessories available

FP00318

(Price is exclusive of cartridge filter)

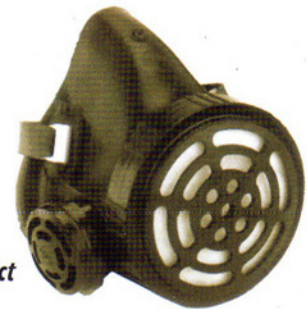

Unistar™ Quarter Mask Respirator

Reliability, Fit, Comfort and Versatility

This lightweight rugged quarter mask, which has stood the test of time in industry, combines reliability, comfort and versatility. Available with an N95 or P100 filter, UNISTAR is NIOSH approved.

Features and advantages include:

- Comfortable, soft rubber or silicone facepiece
- Uses a single filter (N9510 or R57B-P100) which means cost savings when compared to dual-filter half mask respirators
- Small profile doesn't interfere with eyewear and results in less material in contact with face for more comfort in hot and humid environments
- Double exhalation valves for easy breathing
- Adjustable rubber headband w/2 point suspension to allow for "carrying around the neck" when not in use
- Compact size allows wide field of vision
- Disassembles easily for cleaning and part changes
- Probed version or fit test adapter available for quantitative fit-testing

New Headset range

With its carefully designed microphone/speaker system and excellent attenuation, the new headset range offers unique acoustic performance providing outstanding communication in very high noise environments. Peltor's proven and durable designs ensure high comfort levels, allowing long term use under very tough conditions.

Individually sprung headband wires of stainless sprung steel provide an even and consistent distribution of pressure around the ears.

EP00805

Soft, wide foam and fluid-filled sealing rings with built-in pressure-equalizing channels provide low pressure, effective sealing and ideal comfort.

High attenuating cups with optimised acoustic design and excellent space for the ears for best possible sound quality and comfort.

Beam-mounted earphones that provide the least possible resonance and distortion for excellent sound reproduction even in very high noise environments.

Low, two-point fasteners and easy height adjustment with no protruding parts.

Mike arm Quick and easy to set distance, length, height, angle. Easy to switch between speech and standby mode.

Microphone with excellent suppression of ambient noise for clear and reliable communication.

Connection cord, insulated with flexible polyurethane and with a moulded connector.

EP00806

Headband (A) Extra broad with soft padding for ideal comfort throughout the working day.

EP00807

Foldable headband (F) For convenient storage when you are not using the headset

EP00808

Neckband (B) For situations where the headband must not be in the way.

EP00809

Helmet attachment (P3E) Allows the headset to be attached on most of the common helmets.

Attenuation tables

The headsets are tested and approved according to PPE directive 89/686/EEC and applicable parts of the European EN 352-1:1993 standard. Attenuation values from the test report for certificate issued by the Department of Physics, Finnish Institute of Occupational Health, Topeliuksenkatu 41, FI-00250 Helsinki, Finland, ID# 0403. Explanation of the attenuation value table: 1) Frequency in Hz. 2) Average attenuation in dB. 3) Standard deviation in dB. 4) Average Protection Value.

This Premium Double-Dipped PVC green glove has a jersey lining and is treated with ACTIFRESH®. Industry applications for the green colored glove include oils and solvents, petrochemicals and refining. This glove is manufactured with a special blend of high quality plasticizers and resins for maximum flexibility and chemical protection.

HP00936

Electro

the absolutely safe KCL protective gloves made of special natural latex. Test stamps for work with voltages of up to 500V, 1,000V, 7,500V, 17,000V and 26,500 volts. Anatomical design and very good flexibility provide good sensitivity. Different wall thicknesses of the gloves are designed to meet specific requirements. In the classes 0 and 00 we also offer the gloves with cotton flick lining.

Application:

- Power supply and installation companies
- Electrical workshops in all branches of the industry
- Installation, maintenance and repair work involving high voltages

ECONOMY SINGLE-DIPPED PVC

This economy single-dipped PVC glove has an interlock lining with either a smooth or rough finish. Additional uses include utilities, petrochemicals, fishing, ship building, handling abrasive materials coated with grease and oil, caustics, acids and solvents. Provides liquid and basic chemical protection for refining, mining and utilities, petrochemicals, fishing, ship building, handling abrasive materials coated with grease and oil, caustics, acids and solvents.

FPK01000

High Breathable Easy for water vapor to escape out. This feature is ensured by Evaporative resistance (Ret is lower than 7 m² Pa/W, the lower the better) and by MVTR (Moisture Vapor Transmitted Rate is higher than 600 gr./m²h, the higher the better).

High chemical resistance Total protection / no penetration when tested with acids, fuels, oil.

Fire & Smoke Detection Systems

SS3A & SS3-AN

The Model SS3-A, (latching Fire Alarm relay), & SS3-AN (non-latching Fire Alarm relay), retains the outstanding capabilities of the Model SS2-A, but in a non explosion-proof, ABS housing. This Detector senses radiant energy in the Ultraviolet (UV), Visible and Wide Band Infrared™ (IR) spectrum. The radiant energy from all types of flaming fires will alert the detector to their presence. This low-profile detector has a mounting bracket that installs on a standard electrical junction box or to a flat surface, such as a wall or ceiling.

Model FS7 Fire Detection Systems for the Semiconductor Industry The Model FS7 Fire Detection System is a Electro-Optical radiant energy detector that sees Multi-Spectral Wide Band IR, Near Band IR and Visible Band energy from a fire. The Detector is used with the Fire Sentry Model FS7-130-SX controller or Model FS7-WB Control panel. The detector has been designed specifically for Clean Room applications and is used by major semiconductor and wet bench manufacturers worldwide.

FireSentry MultiSpectrum

FS 10

The fire detection and process control system provides a two-stage response for fires. ALERT detects "fireball" type fires in less than half a second in accordance with NFPA 33. If the fire continues to grow, a FIRE ALARM condition is declared in 4-5 seconds. Fire Detection systems are available with a Controller Card/Fire Detector combination or a Wallmount Controller/Fire Detector combination.

HPX - 751

NOTIFIER's HARSH™ (Hostile-Area Smoke Head) HPX-751 smoke detector provides early warning smoke detection in hostile environments where traditional smoke detectors are not practical.

Acclimate Plus

Acclimate provides an optimum balance of stability and early warning to maximise fire detection while rejecting unwanted nuisance alarms. Flash-Scan technology allows Acclimate to respond to a broad range of fires at a faster speed, grouping and scanning 10 devices at a time.

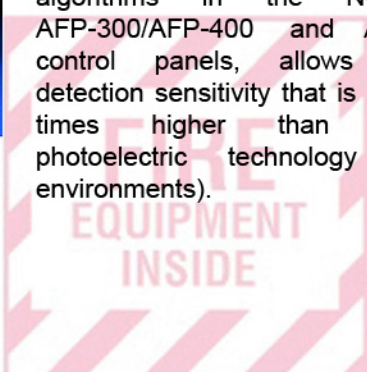

LPX - 751

The unique design of this detector, combined with enhanced AWACS™ algorithms in the NOTIFIER AFP-300/AFP-400 and AFC-600 control panels, allows smoke detection sensitivity that is 10 to 50 times higher than present photoelectric technology (clean environments).

RFX

Plans to add fire detection equipment to commercial buildings are often halted or run over budget because of wiring challenges created by ceiling or wall designs, some involving materials such as marble or rock. RFX wireless smoke detection system can be the solution.

Pullman Holt Model 45 ASB Vacuum

Use to recover asbestos or lead. This compact and portable HEPA vacuum provides outstanding performance at an economical price. Equipped with a powerful 1.5 HP motor and an extra capacity HEPA filter system. Holds upto 10 gallons and has a waterlift of 87". Heavy-duty construction and materials make it a true work horse. Quiet design keeps noise level minimal. Meets NIOSH HEPA efficiency requirement.

45 ASB

Part Number	Description
FP00625	10 Gallon Dry HEPA Vac with Tool Kit
FP00626	Replacement Tool Kit
FP00627	Wet/Dry Conversion Adapter Kit
FP00628	HEPA filter
FP00629	Dacron Filter Bag
FP00630	Paper Filter - 1 ea

FP00631b

FP00631c

HEPA-AIRE Negative Air Machines

The H600V is lightweight and portable and ideally suited for use where space is limited. The compact design of the H1000V is well suited for smaller rooms where less airflow is needed, and a larger machine will not fit. Model: H1990HP can filter nearly 2,000 cfm of air yet weighs just 142 pounds. The most popular H2000HP model delivers the same superior airflow as the H2000HPA, but without the Magnehelic gauge and audio filter alarm. For large commercial projects, the powerful H5000C model is recommended. All machines feature solid-rivet construction, gasketed critical seams, carrying handles, recessed controls, 2-3 filtration stages, a HEPA filter and meet or exceed applicable U.S. and Canadian Safety Standards.

Dri-Eaz Dehumidifiers

A Dri-Eaz dehumidifier is the linchpin of your restorative drying system. Without a proper dehumidifier, air movers would continually circulate evaporated moisture and cause secondary damage, Dri-Eaz dehumidifiers are finely tuned restoration machines that remove water vapor from the air and surrounding structural materials and feature, a hot-gas bypass defrost, touchpad controls, an hour meter, centrifugal water pump-out with 40-foot hose, a high airflow, semi-pneumatic wheels, and are UL,C-UL listed for safety.

Part Number	Description
FP00632	DrizAir Evolution LGR
FP00633	DrizAir LGR 2000
FP00634	DrizAir 1200

FP00636

FP00637

Pullman-Holt F500 Blower Fan

The F800 Blower Fan is designed to provide quick and uniform drying. The 0.75 hp motor operates on three speeds, adjusting the volume of airflow up to a maximum of 3500 CFM to meet your drying needs. The off-set toromolded carrying handle distributes the 38 pounds evenly.

Part Number	Description
FP00635	F500 Blower Fan, 20H x 17W x 19 D

MSA Orion Multi-Gas Detector

The Orion Multi-Gas Detector is a reliable and easy-to-use portable instrument for detecting the presence of O₂, H₂S, CO and combustible gas. It will stand up to the roughest handling in the toughest environments. Includes a built-in sampling pump for OSHA confined space entry.

Feature Include:

- One-Button Calibration
- Large, Easy-to-read Display
- Long-Life Battery
- Durable Sensors
- Carbon-filled Nylon Case

Part Number	Description
FP00638	3-Gas LEL, CO, O ₂
FP00639	4-Gas LEL, CO, O ₂ , H ₂ S

IP / CCTV Monitoring

Axis 211

The AXIS 211 is an indoor/outdoor IP camera with good resolution. It can be used outdoors with enclosure and includes built-in motion detection.

GS4600

GS1600

VivoTek IP6112

Indoor/Outdoor Network Camera with Excellent Video and Synchronized Audio includes dual compression - MPEG-4 and M-JPEG selectable.

GS4000G

GS4600H

GS1200G

IQ Camera Systems

Very high performance network attached cameras with digital zoom capability.

Provides higher resolution than the Axis2420. The models IQ300/600 also provide better low light sensitivity.

There are different models to choose from: featuring a choice of 1280x1024, 1600x1200 or 2048 x 1536 resolution. The new high speed 700 series provides up to 30 fps performance and low light level sensitivity.

Sony provides a wide range of IP cameras for every application. The latest cameras include dual compression options(MPEG-4 or M-JPEG), making these cameras perfect for every application. Select from fixed, dome, or PTZ cameras.

Sony Cameras

Panasonic

Panasonic provides a wide selection of hybrid cameras that have both analog and network connections. They also have a number of dome and PTZ cameras that provide very good performance.

IPSS is the prime supplier for IP based camera security systems in the region.

Offering all the benefits of standard CCTV, which we may also supply, our systems have the added advantages of running over standard network system, meaning only one set of cabling need be installed and the ability to view cameras remotely from anywhere in the world via a standard internet connection. Meaning one can watch over their office back home while sipping margaritas on a beach in the Caribbean!

Our security team can provide a full service from conception and identification of client needs, including intruder alarm and motion detector systems, through the cabling and install process all the way up to post install configurations and user training.

Alongside this we can provide complete fire detection and alarm system to compliment our security solutions, thus providing a complete one stop office security and fire detection package.

HT01301

HT01300

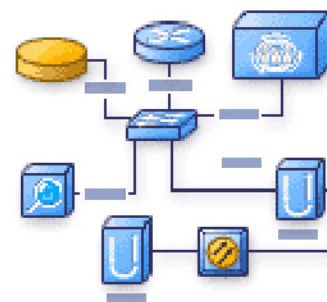

HT01302

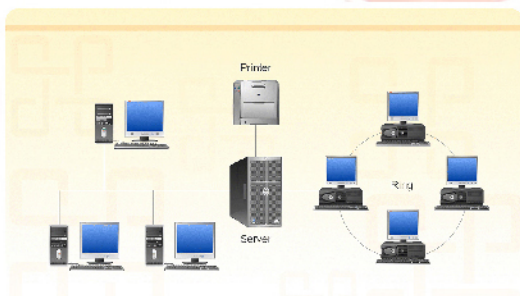

IT Systems & Network Design Division

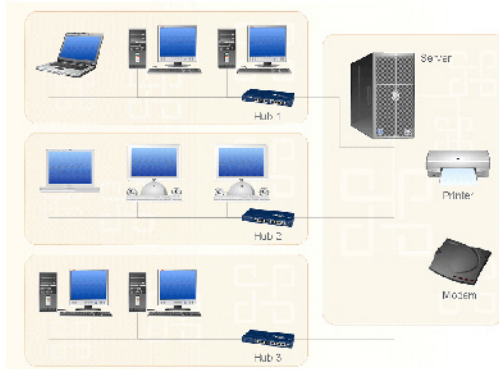

Here at IPSS we pride ourselves on the quality we provide and with the IT Systems and Design division it is no different.

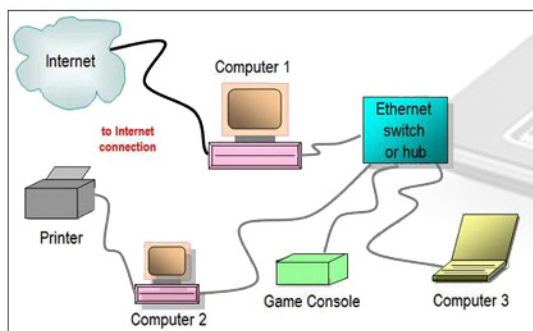

We can provide a cradle to grave service starting with the identification of your organization's requirements onto network and system design, full cabling and system installation on site and, where needed, bespoke configuration and training if necessary. All this coupled with clearly defined and agreed SLATs (Service level agreements) to provide post project system support to provide complete peace of mind.

All of this is project managed from day one by members of our Design and implementation team who have over a quarter on a century of experience in all sectors of the industry from Private corporations to Government; local, national and international, NGOs in various countries, Banking and Healthcare.

Only the best is deemed the right product for our clients and with that in mind all our networking equipment will be Cisco, 3Com or DLink. The same is true for hardware, peripherals and software; these are Dell, HP or Fujitsu Siemens, with Microsoft WindowsXP and Windows Server2003 being the software of choice.

Pulling together this combination of the best hardware and components with some of the most experienced staff in the region allows IPSS to provide your organization with the most complete and ultimately cost effective business solution.
